COCONUT FIBRE

Coconut Fibre is a natural fibre extracted from husk of the coconut fruit. The husk contains 20% to 30% fibre of varying length. After grinding the husk, the long fibres are removed and used for various industrial purposes, such as rope and mat making. The remaining material, composed of short and medium-length fibres as well as pith tissue, is commonly referred to as waste-grade coir. The waste grade coir may be screened to remove part or all of the fibre, and the remaining product is referred to as coir pith.

Specifications :

- Colour : ♦ White
- ♦ Brown
- Quality : ♦ Export Quality
- ♦ Yarn Quality
- Packing : 120 Kgs & 35-50 Kgs
- Uses : ♦ Coir Mattress
- ♦ Coir Mat
- ♦ Geo Textiles
- ♦ Coir Pots

COIR YARN

Coir Yarn is generally of 2 ply, spun from coir fibre by hand as well as with the help of traditional raths, automatic spinning machines etc. Made out of best one the brush fiber (2 ply) with 2 synthetic threads twisted for additional strength and durability. Available indifferent forms like hydraulically pressed bales, spools bobbins, dhols, balls, Geo-textiles (land - scalping and on embankments of road construction for prevention of soil erosion), etc. cut length for various industrial and agricultural purposes.

Specifications :

- Colour : ♦ White
- ♦ Brown
- Type : ♦ Mangadan
- ♦ Roll mudi
- Quality : ♦ Hard twist
- ♦ Loose twist
- Packing : 1 Kg to 30 Kgs

COCO PEAT

Coir Pith (or) Coco Peat a waste product obtained during the extraction of coir fibre from husk is very light, highly compressible and highly hygroscopic. It is used as a soil conditioner, surface mulch/ rooting medium and desiccant. Composted coir pith is an excellent organic manure for indoor plants as well as for horticulture crops. Several firms are manufacturing composted coir pith in the country. Compressed coir pith in the form of briquettes for easy transportation is also manufactured in the country.

Specifications :

- Size : 30 x 30 x 12 cms
- Weight : 4.8 to 5.2 Kgs
- Quality : ♦ Low EC
- ♦ High EC
- Type : ♦ Seived
- ♦ Unseived
- pH : 5.5 - 6.5
- Packing : 120 Kgs & 35 to 50 Kgs

COCONUTS

Coconuts are known for their versatility ranging from food to cosmetics. Coconuts are distinct from other fruits for their endosperm containing a large quantity of water and when immature, may be harvested for the potable coconut water. When dried, the coconut flesh is called copra. The oil and milk derived from it are commonly used in cooking and frying, as well as in soaps and cosmetics. The coconut also has cultural and religious significance in certain societies, particularly in India, it is using in Hindu rituals.

Specifications :

- Coconut :*
 - ♦ Full Husk Removed Coconut
 - ♦ Semi Husk Removed Coconut
 - ♦ Copra
- Tender Coconut :*
 - ♦ Full Tender Coconut
 - ♦ Peeled Tender Coconut
- Packing : As per requirement

COCO BROOM STICK

Coconut Brooms are made from coconut tree leaf by clean the raw coco sticks and then manufacture into brooms. which is suitable for cleaning rough ground and are ideal for stiff sweeping jobs such as sweeping fallen leaves and cleaning between stones etc. Coconut Brooms are offered in different types such as Hard Brooms and Soft Brooms. It is environment friendly material. Now a day's brooms are highly demand in domestic and international markets since use in industrial sector also.

Specifications :

- Size : ♦ All Mixed
- ♦ 0 to 36 inches
- ♦ Above 36 inches
- ♦ 36 to 42 inches
- ♦ Above 40 inches
- ♦ Above 42 inches
- Quality : Karur, Pollachi
- Packing : 50 Kgs Bundle

COCONUT OIL

Coconut oil is made from fully dried copra having maximum moisture content of six per cent. India has unbeatable quality advantage in this sector. Coconut oil is used in the country as a cooking fat, hair oil, body oil and industrial oil. Refined coconut oil is mainly used in the manufacture of biscuits, chocolates and other confectionery items, ice cream, pharmaceutical products and costly paints.
